

# Stelios Taliadoros

## Junior Front-End Developer

My enthusiasm about technology brought me to the department of Computer Science of Frederick University where I am currently studying. I'm fully passionate about programming. I am always curious to find new things to accomplish and always trying to improve my skills to the highest level of productivity. Always eager to learn new things and help others with learning as well. Equipped with experience in team work and problem solving as well as hands on experience with programming languages. Open for new opportunities to learn and grow.
